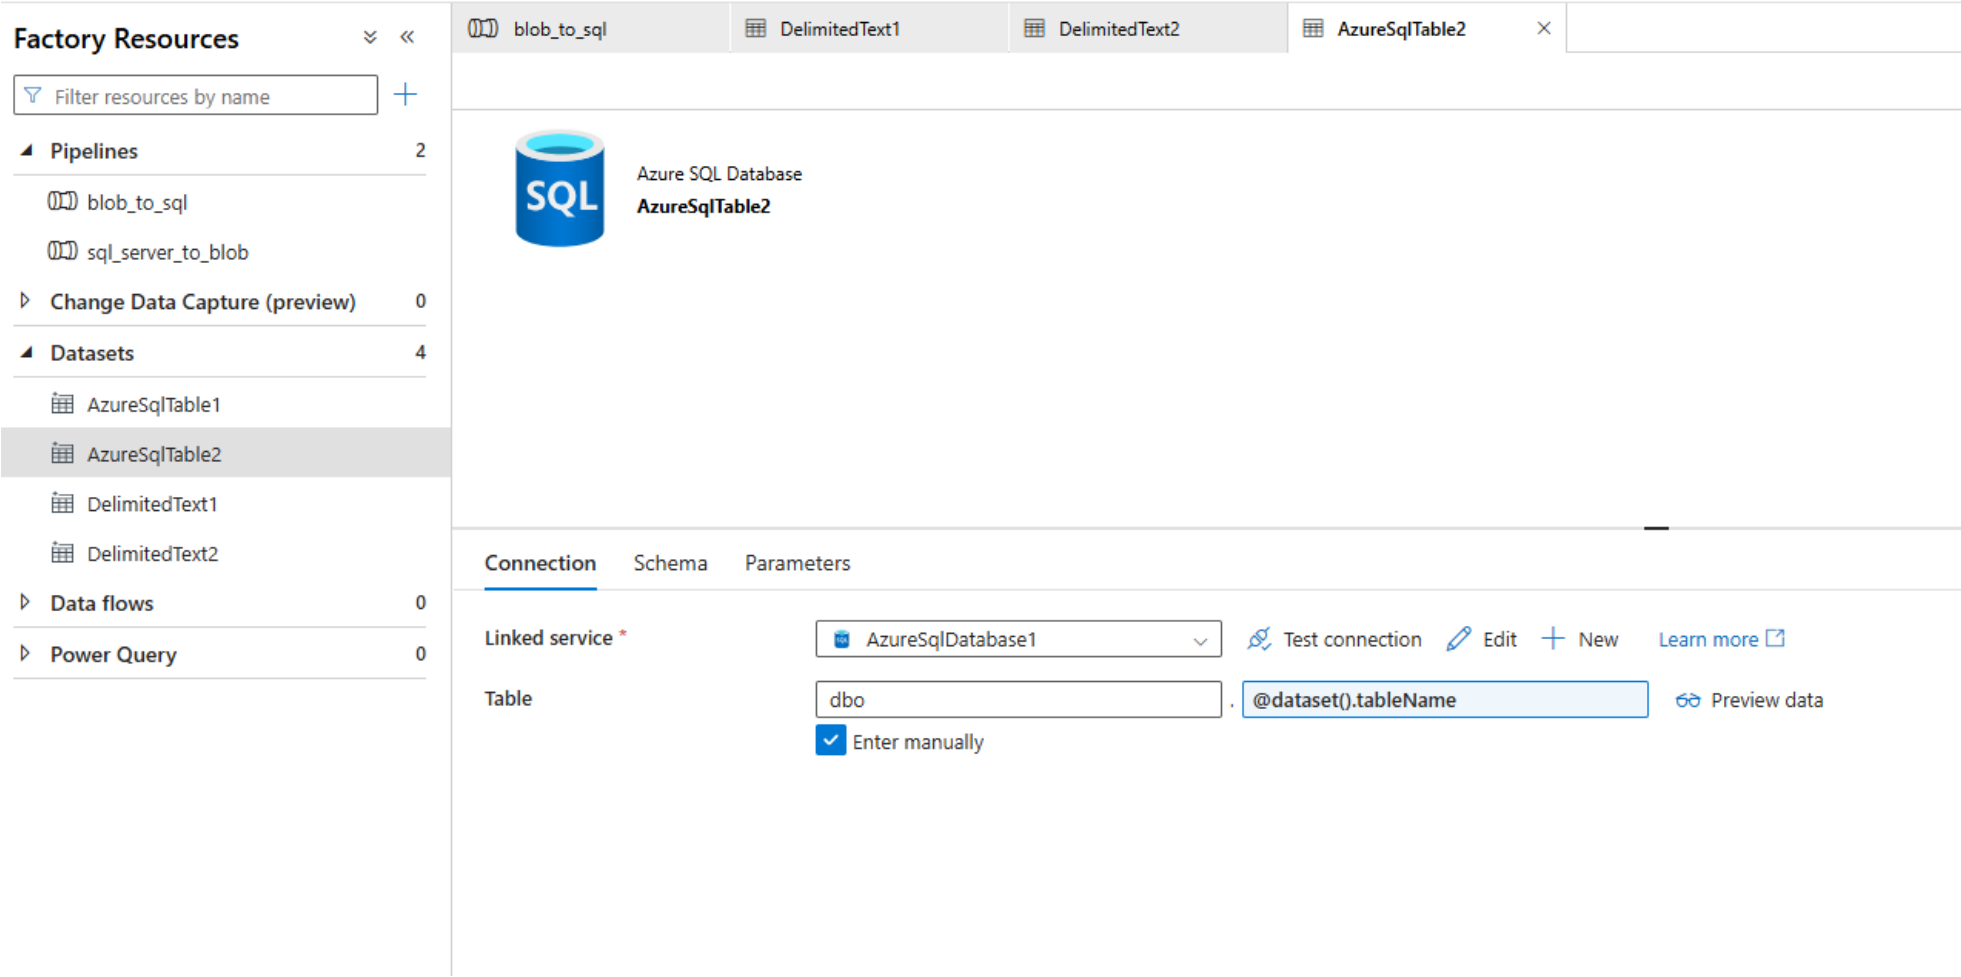
Name: Sumit Chauhan
Dept: Data Engineering
Module: Practice of ADF

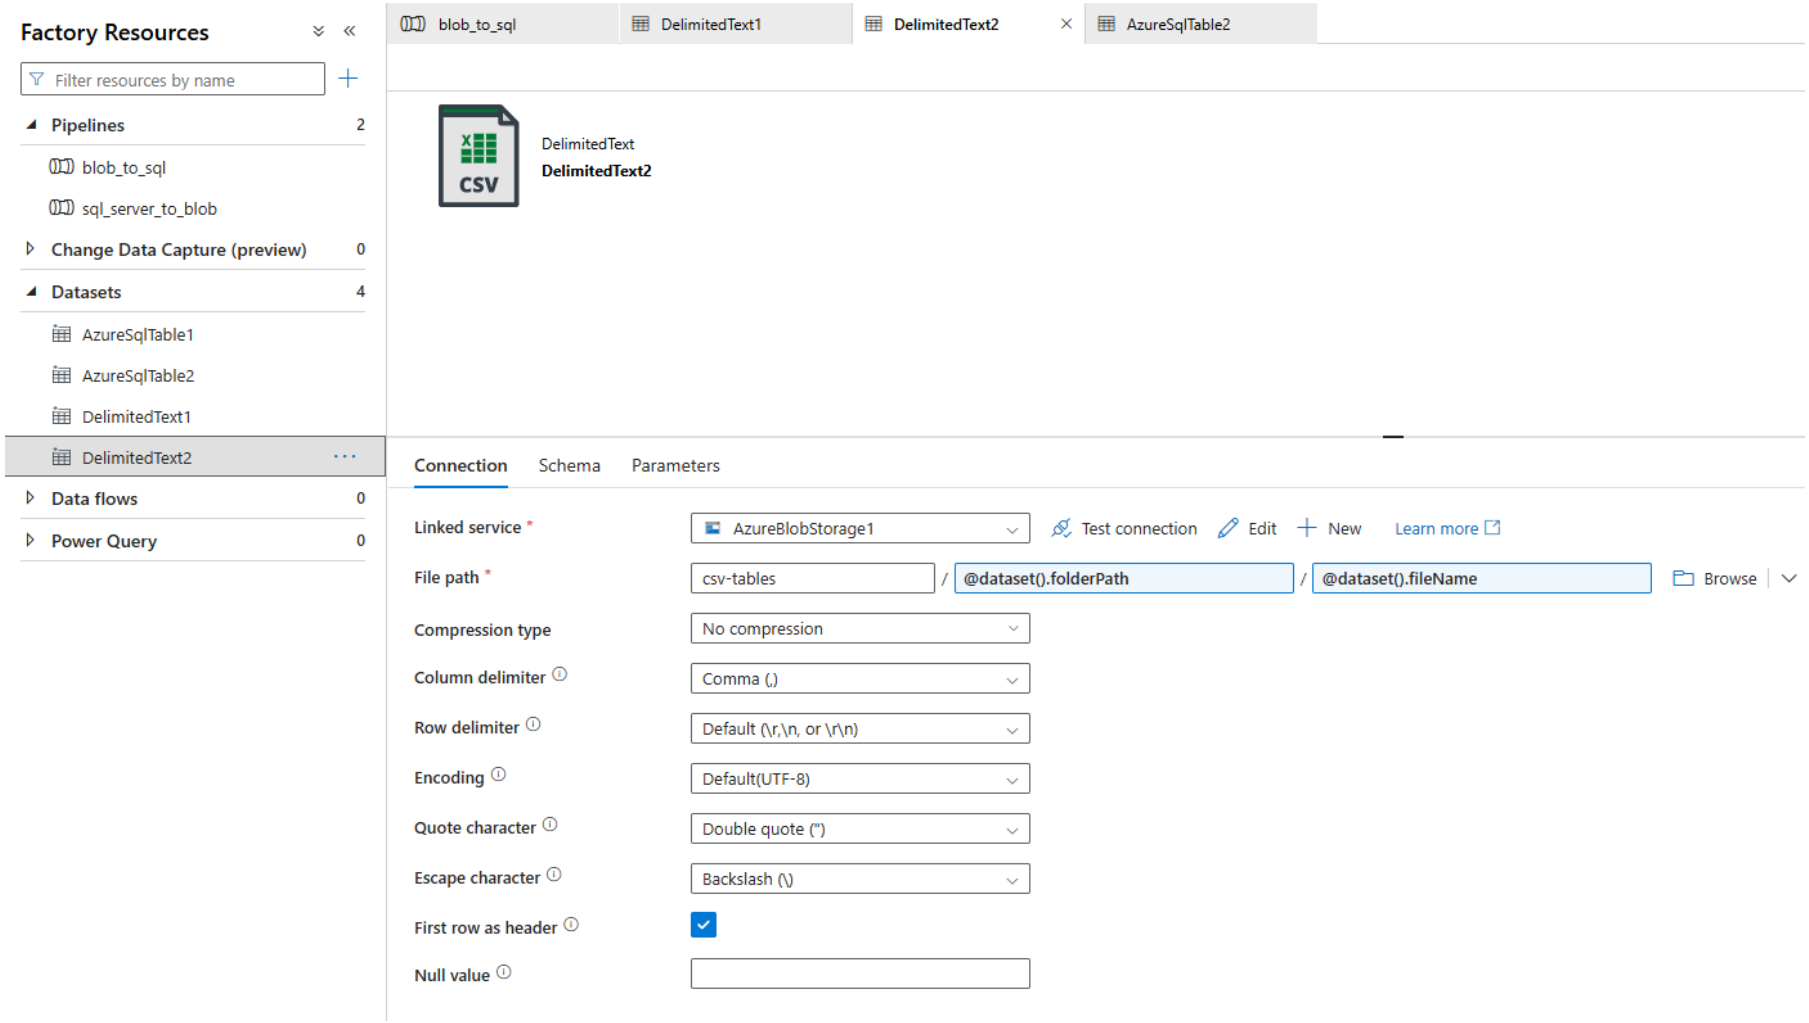
Practical: **Parameterize Datasets for Flexibility**

Task: Parameterize the source file path in ADLS and the destination table name in SQL Server, and trigger the pipeline using an event-based trigger when a new file arrives in ADLS. Create dynamic datasets that can be reused with different parameters (for example, changing file names or table names).

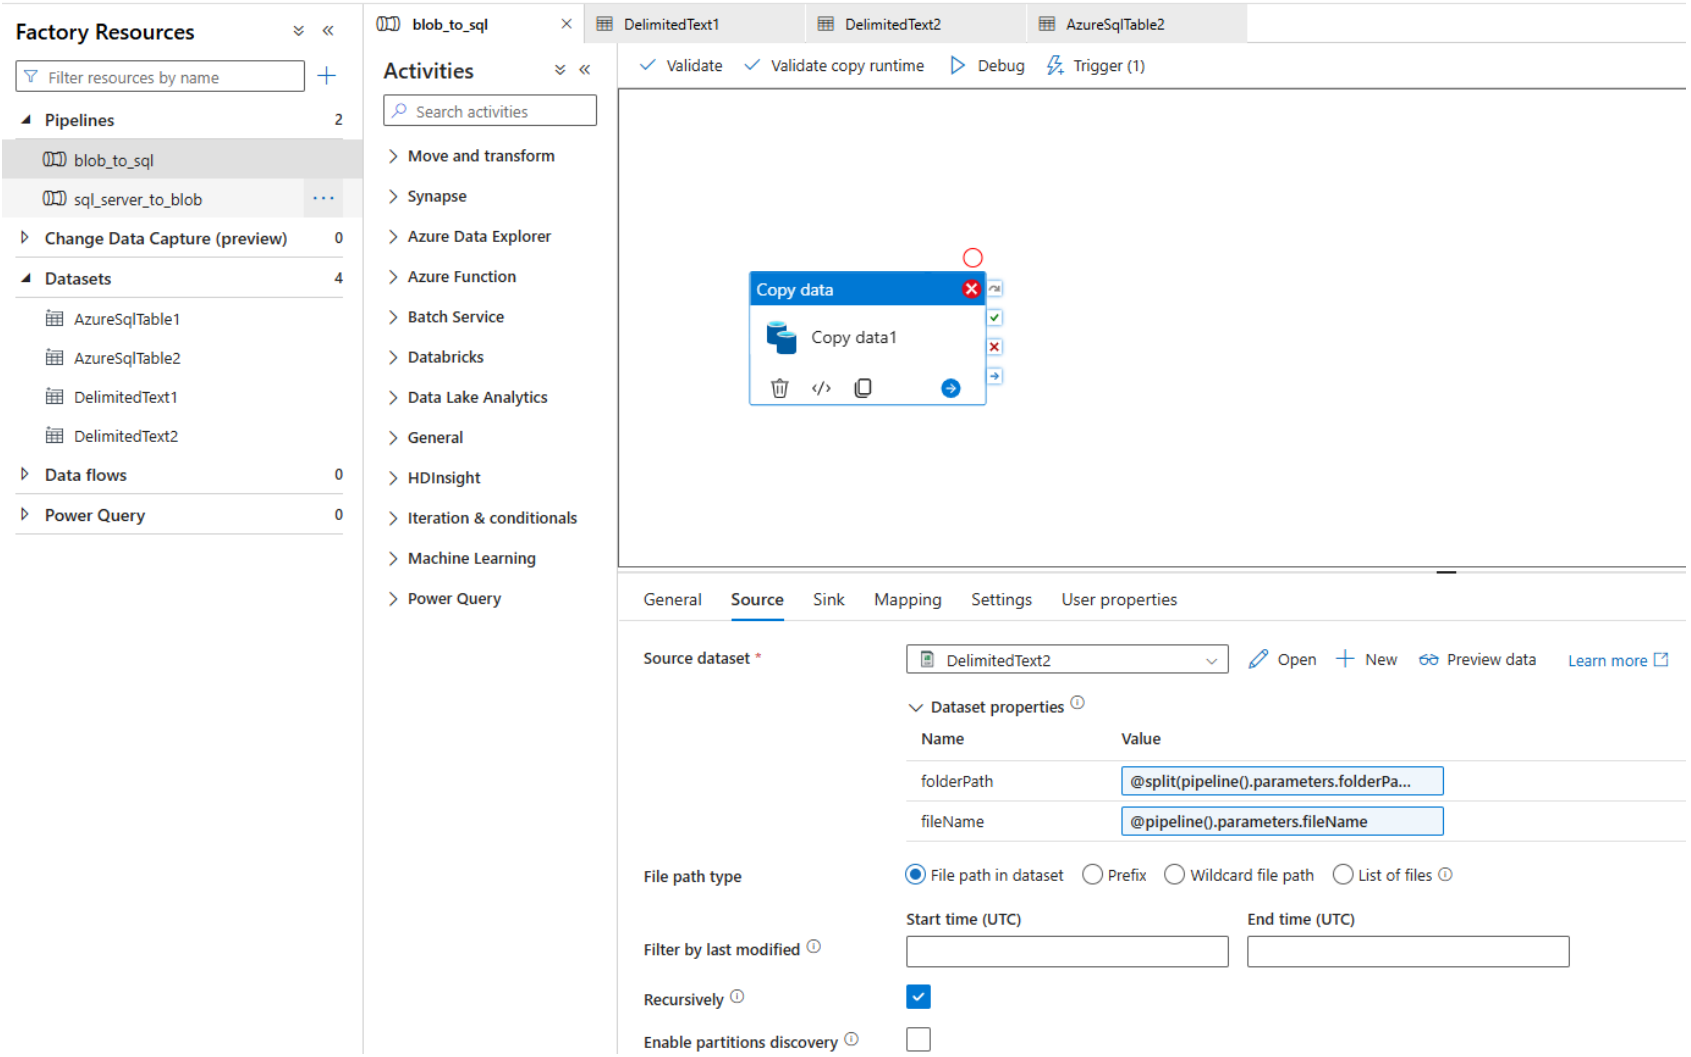
Sql dataset creation (with tableName param)



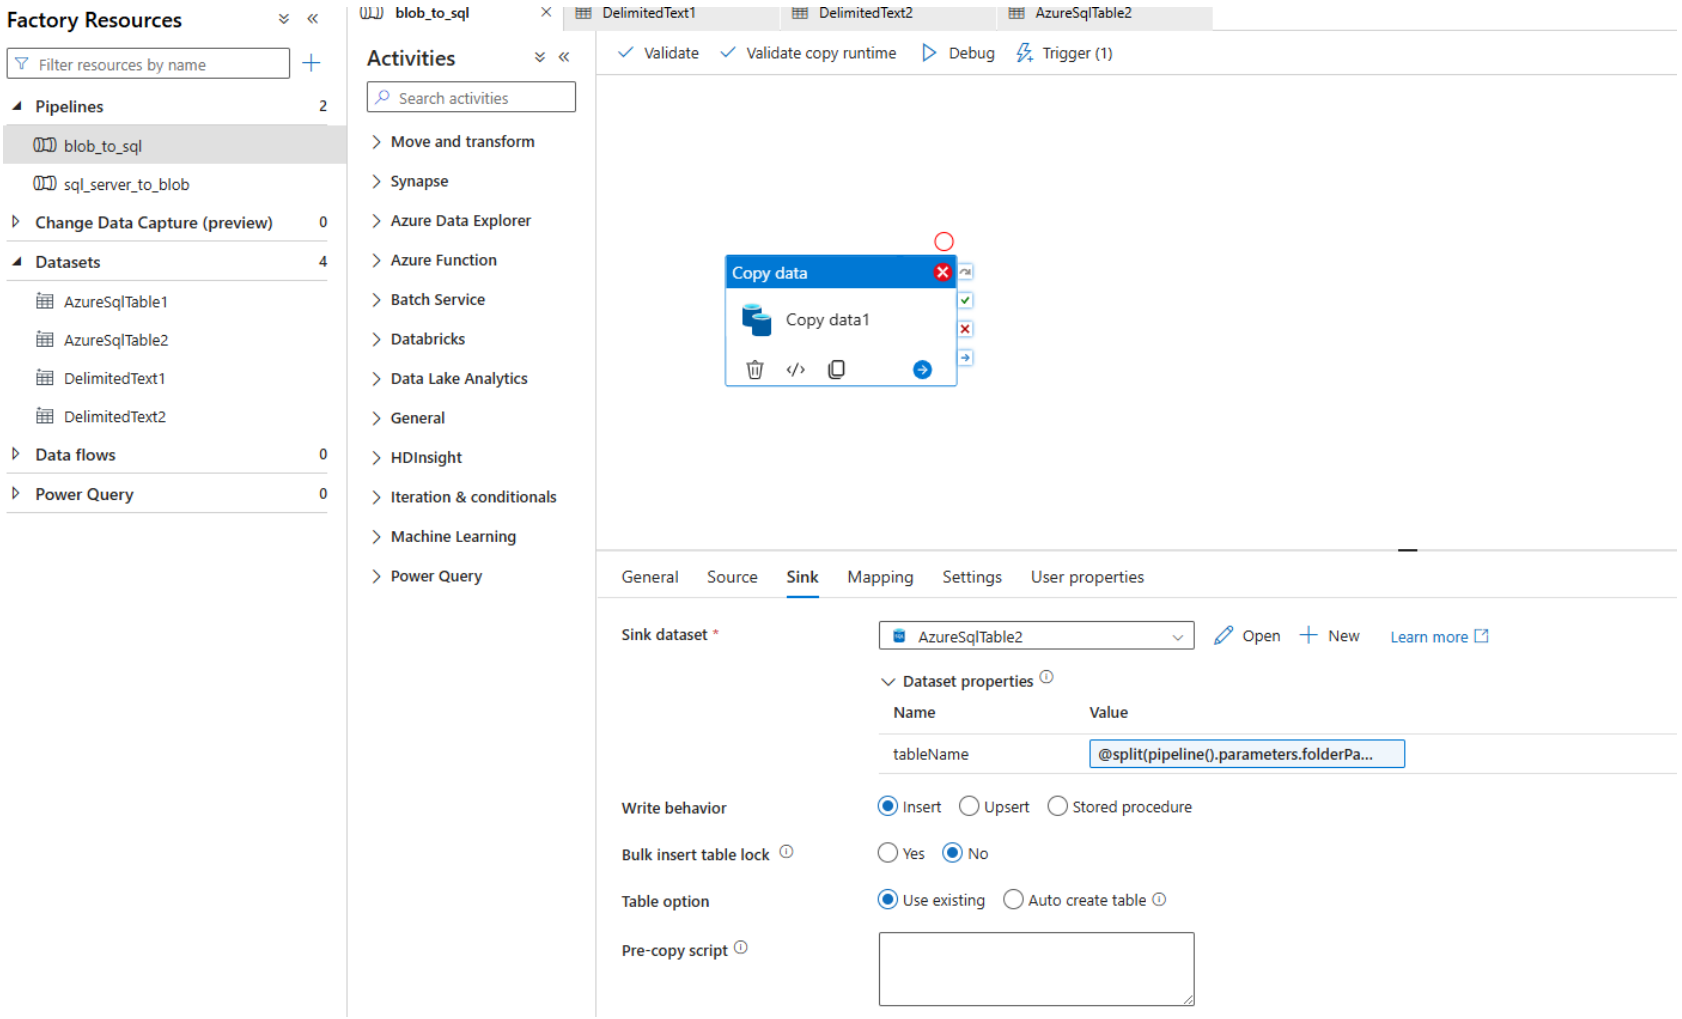
Blob dataset creation(with folder, file params)



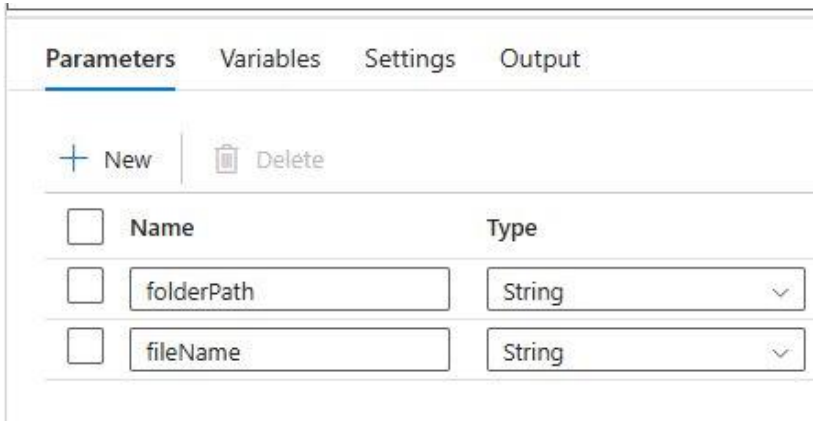
Pipeline copy activity (source)



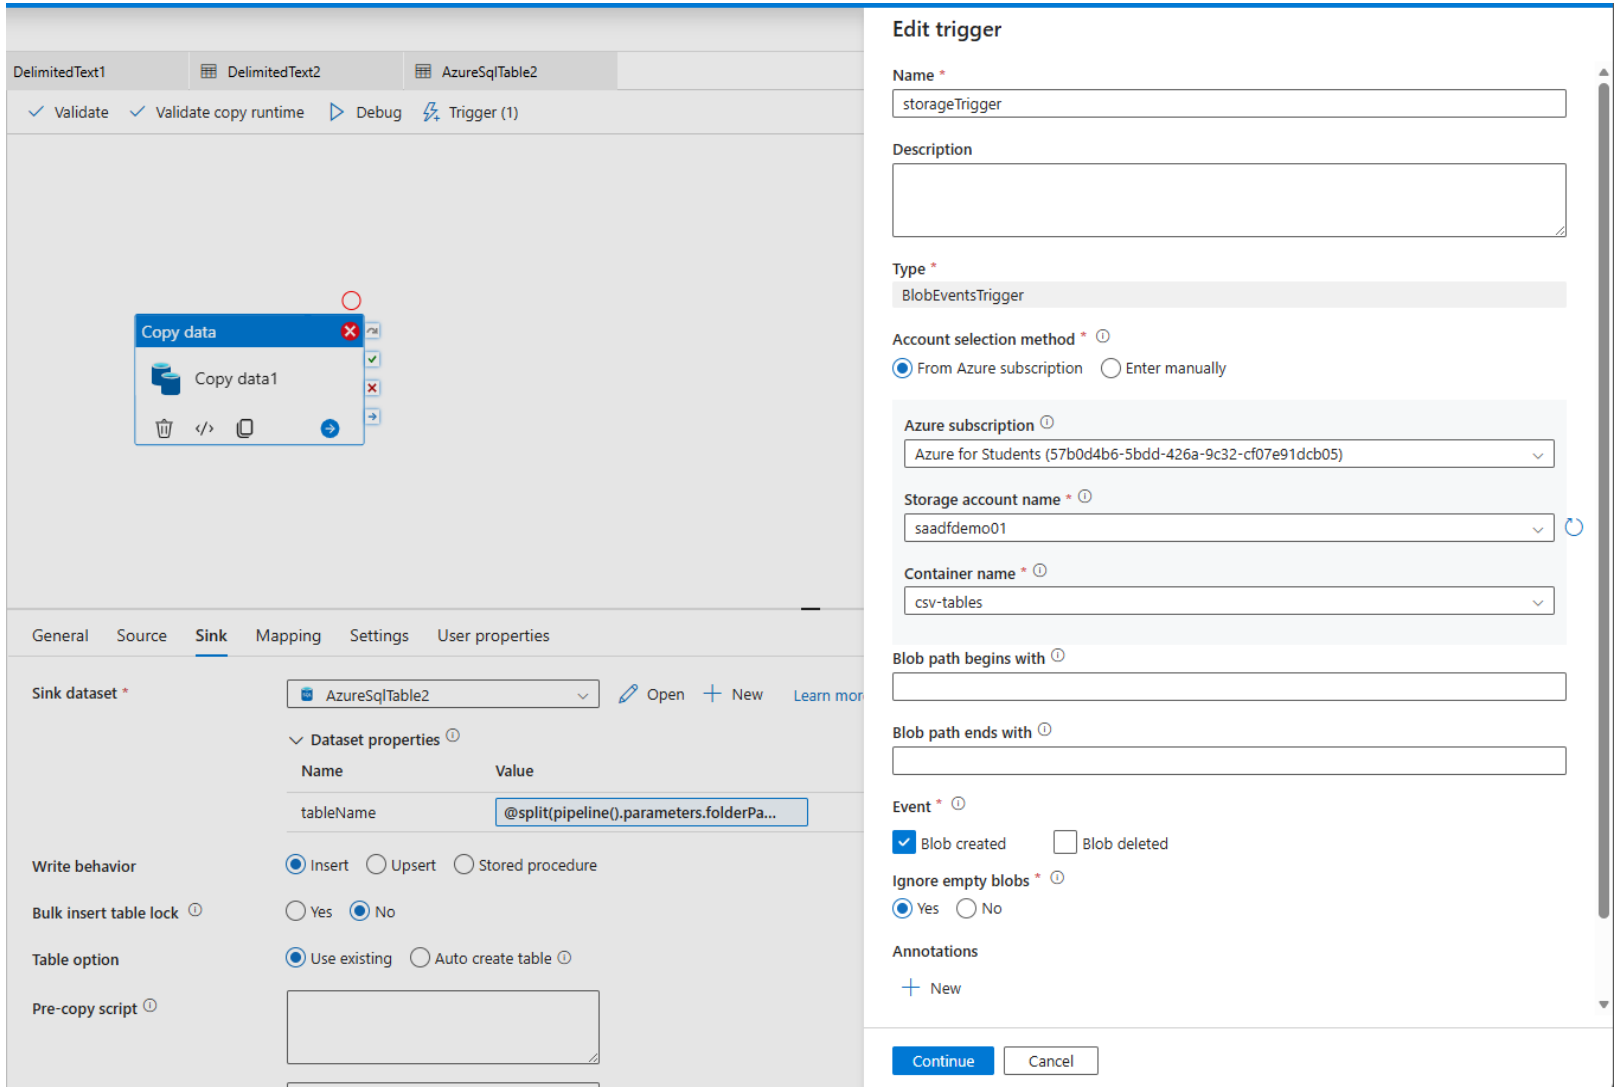
Pipeline copy activity (sink)



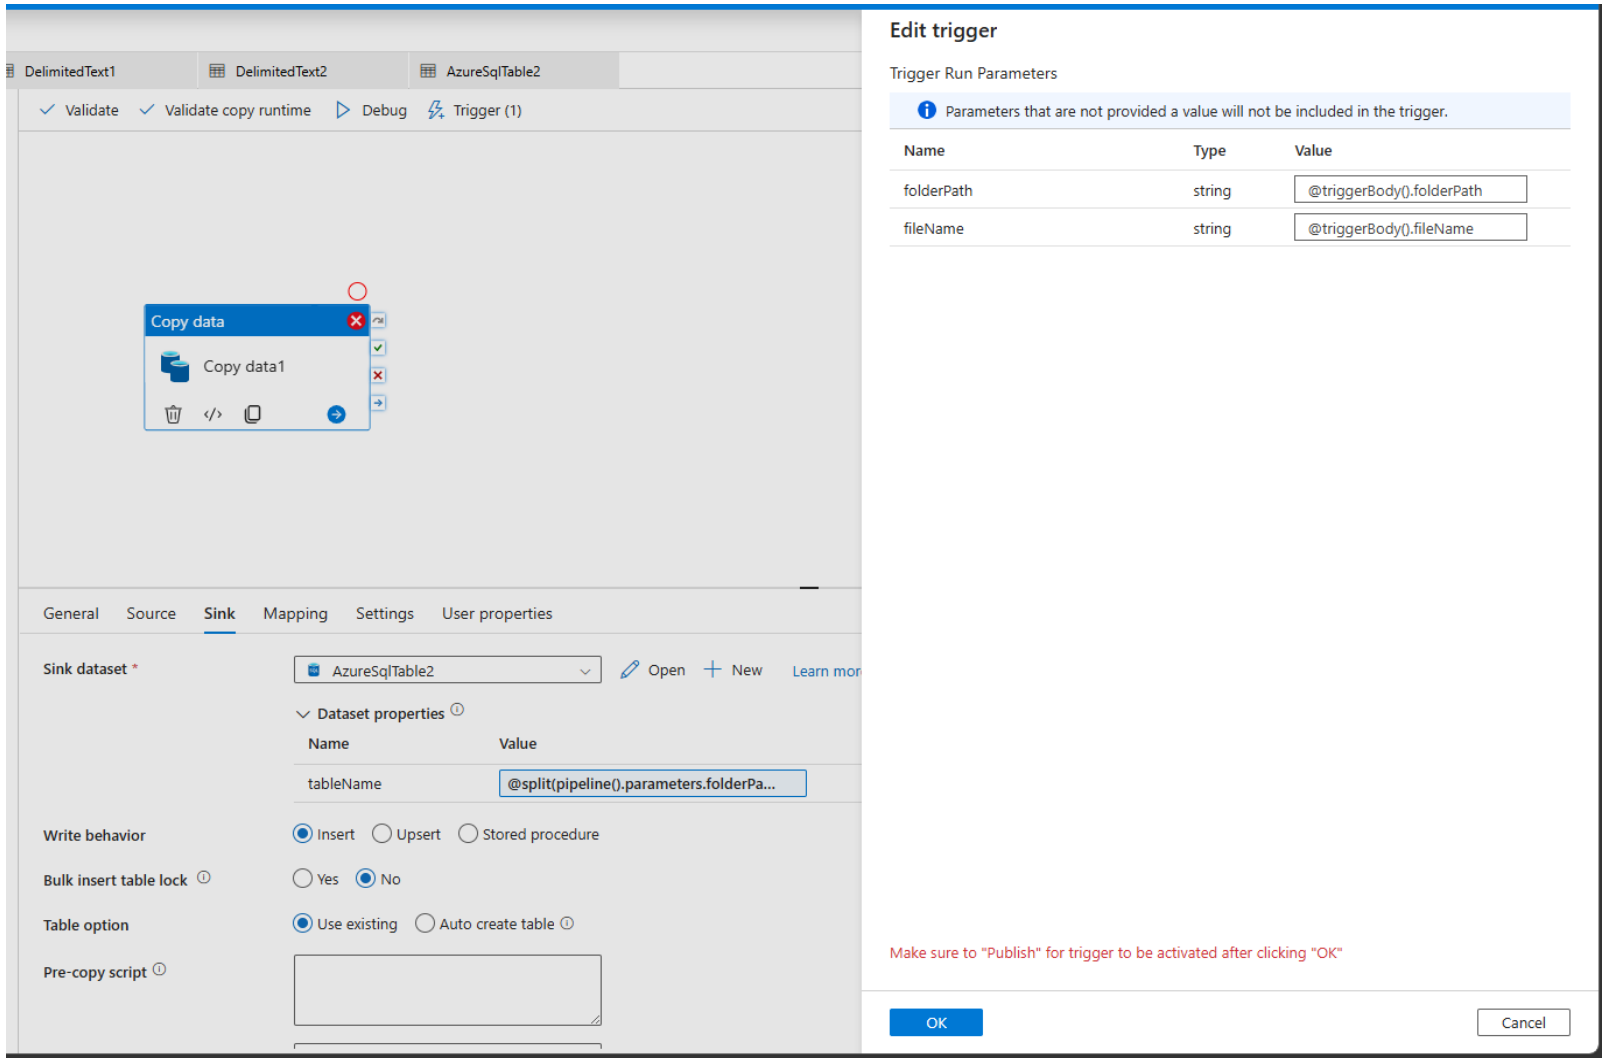
Pipeline parameters



Adding storage trigger



Set trigger parameters to pipeline parameters(Very imp)



Uploading blob
