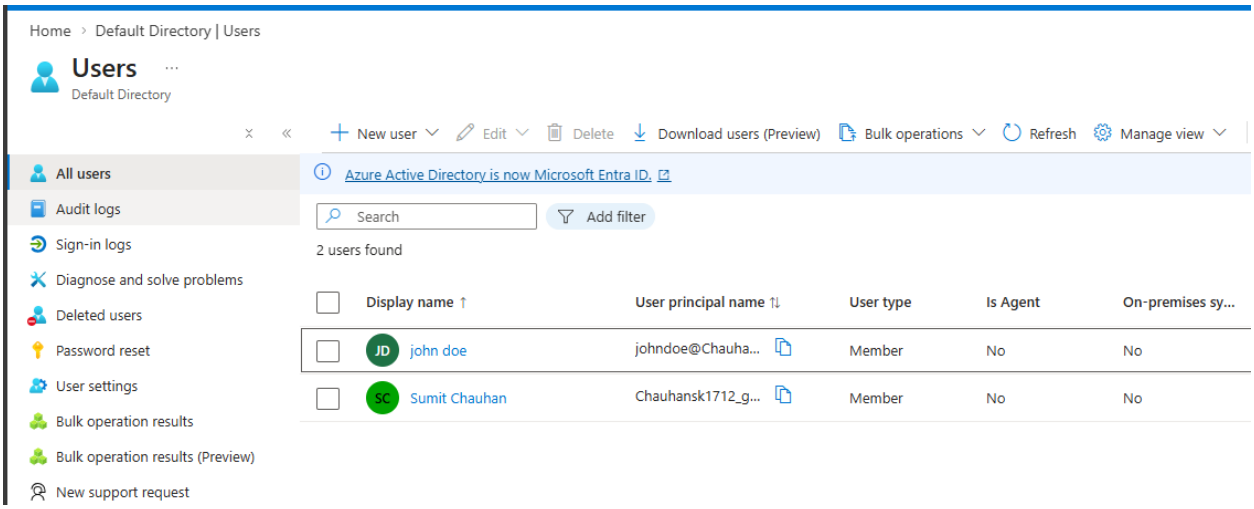
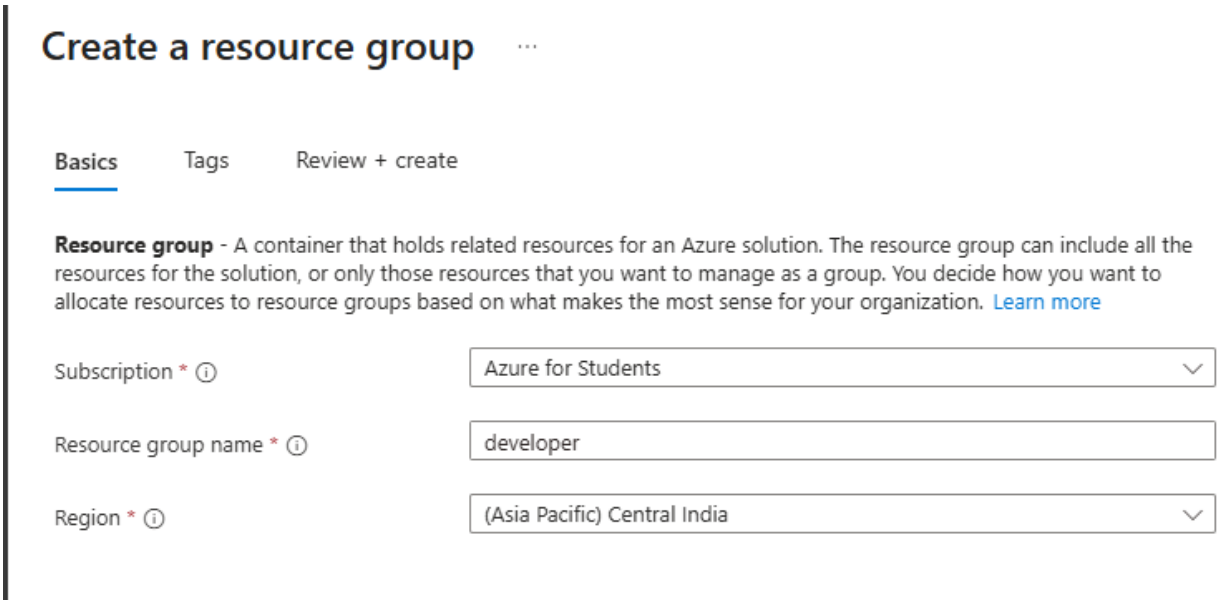
Groups

Roles



Creating resource group developer



Once new user is created,

You can login with new user,

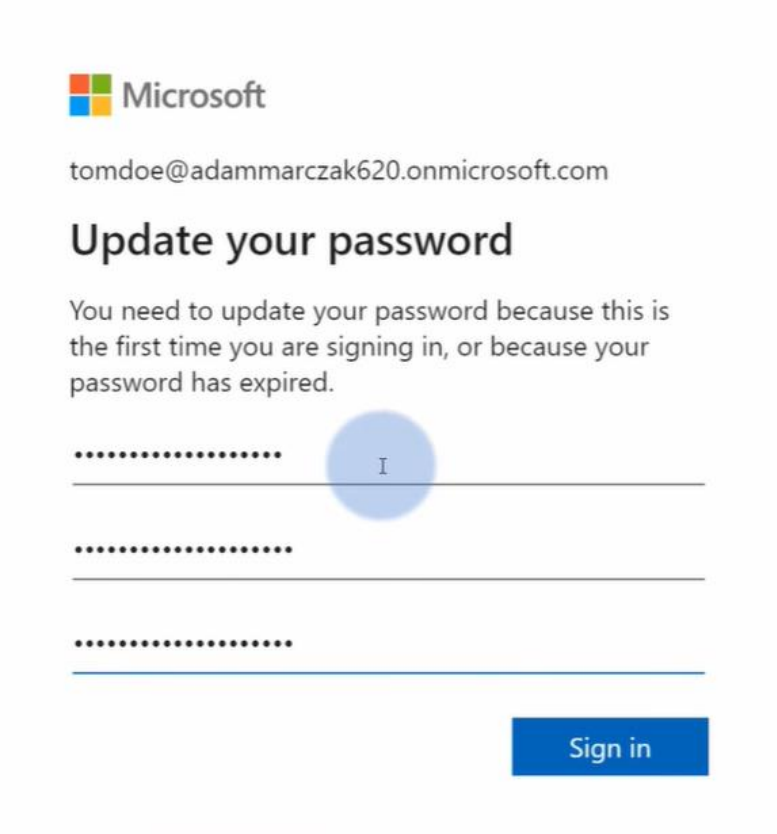
Open new icognito tab and try login to azure portal

Enter the email which is assigned to john doe

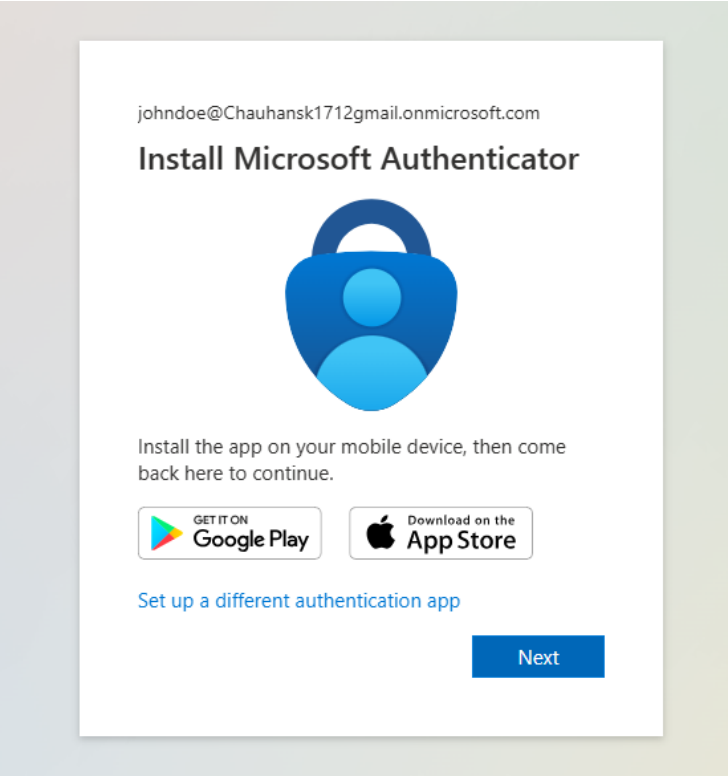
And enter the password when creation of that user (here john doe)

For the first login, user will be asked to change the password by their choice

The below image is for reference



User may asked for MFA with microsoft authenticator app

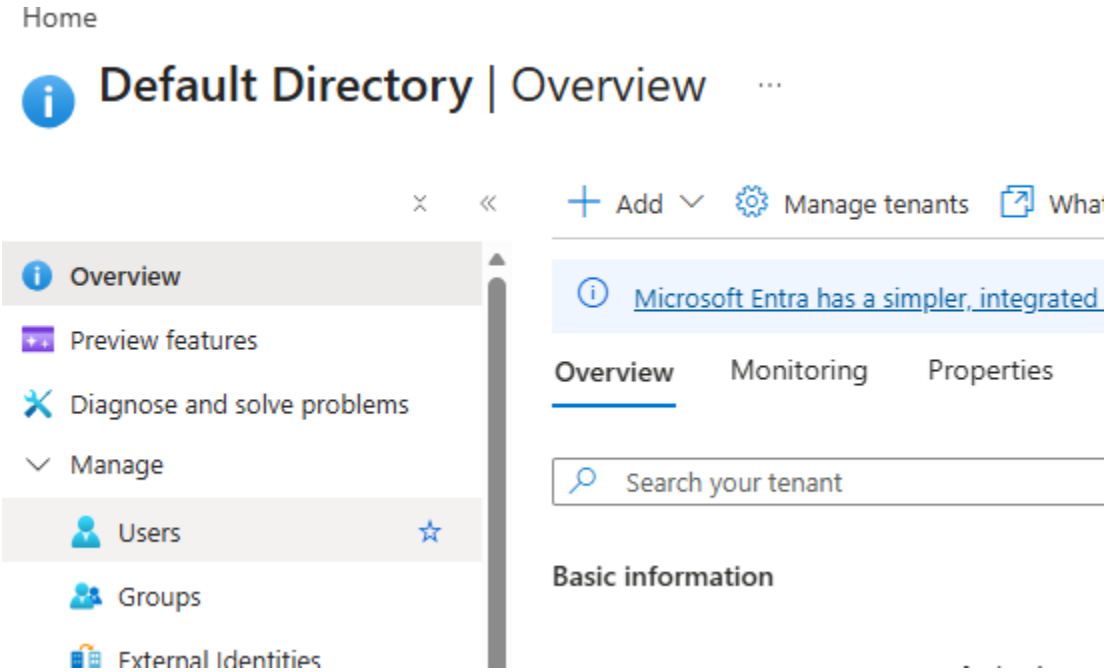


Follow the MFA steps with Microsoft Authenticator app on your mobile

(QR or authentication code or both)

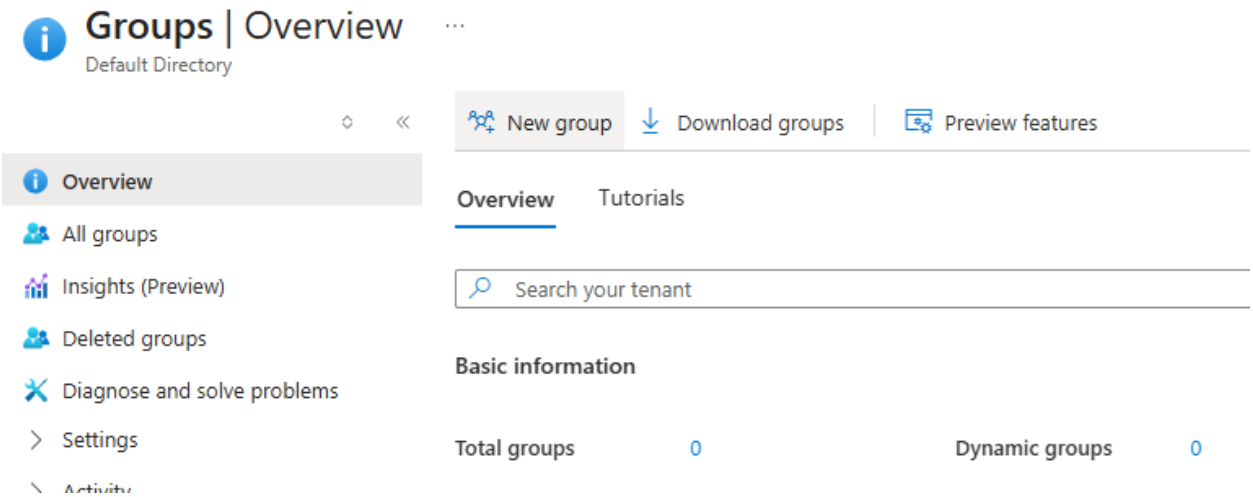
Group related practice:

Go to entra ID page in azure portal

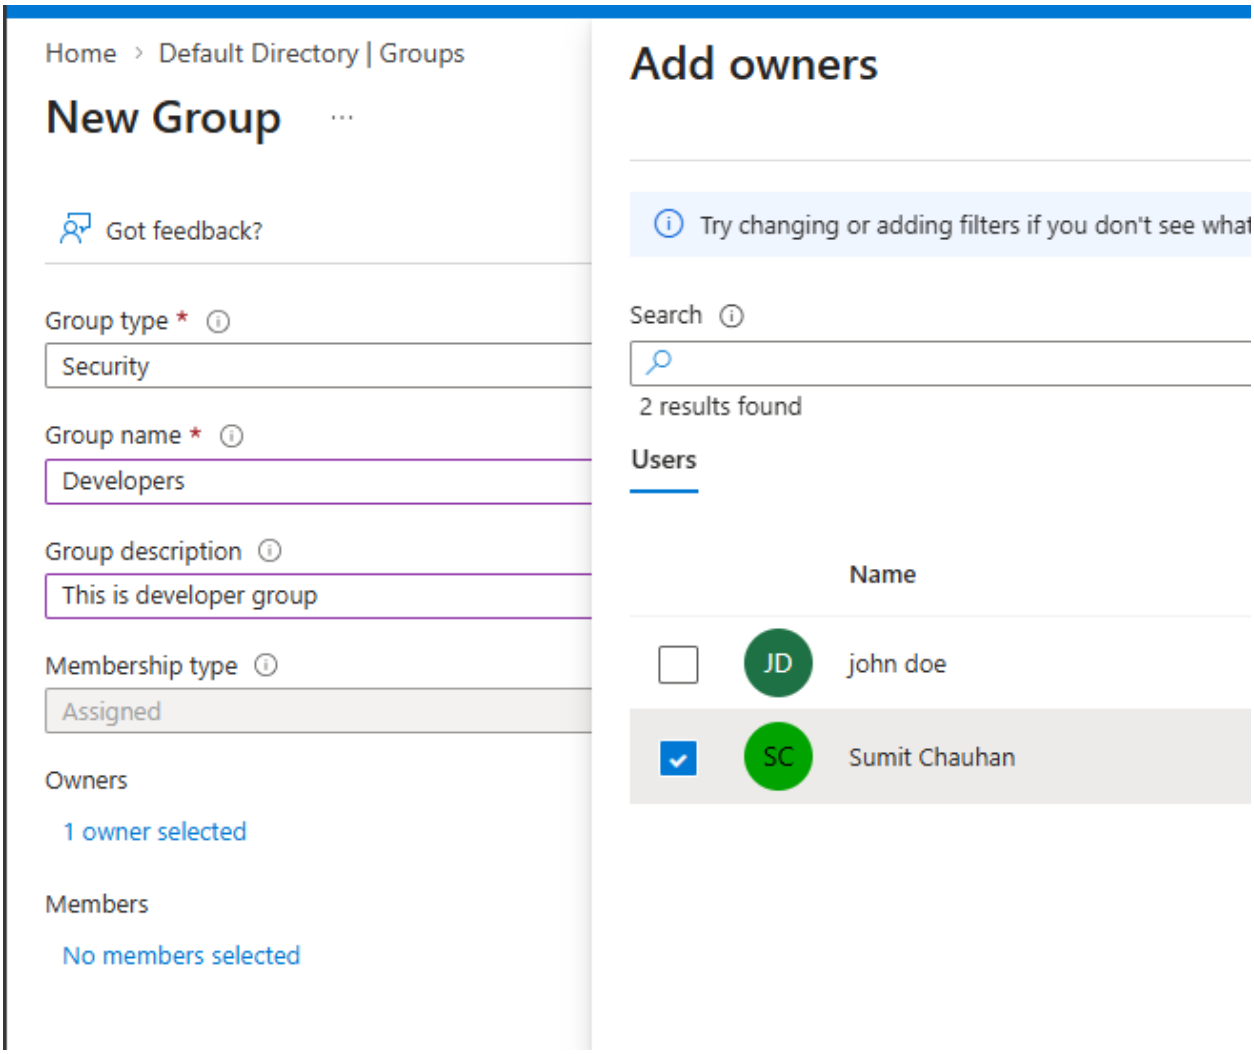


Click on Groups

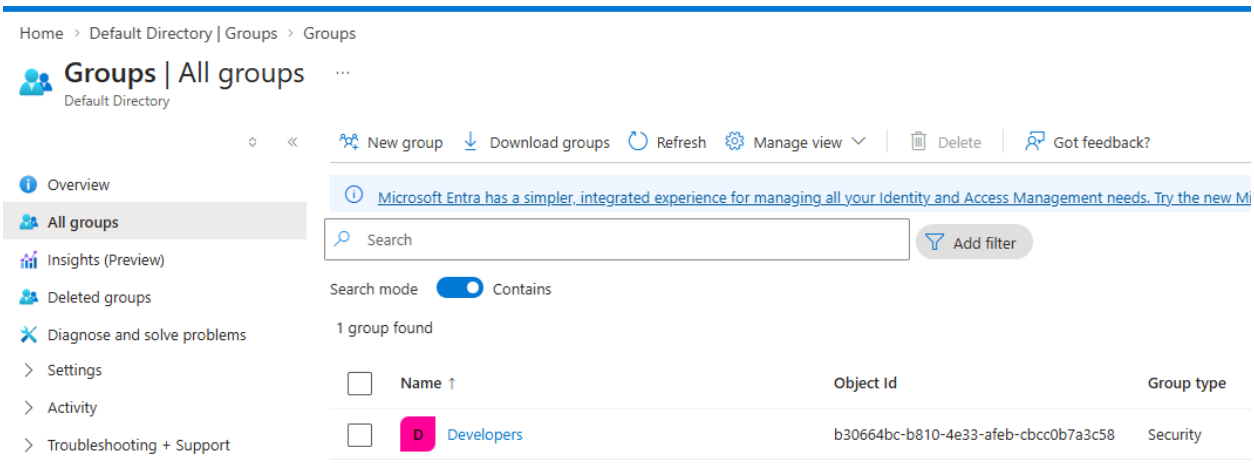
And create new group



Add necessary details, also make sure to add owner to that group

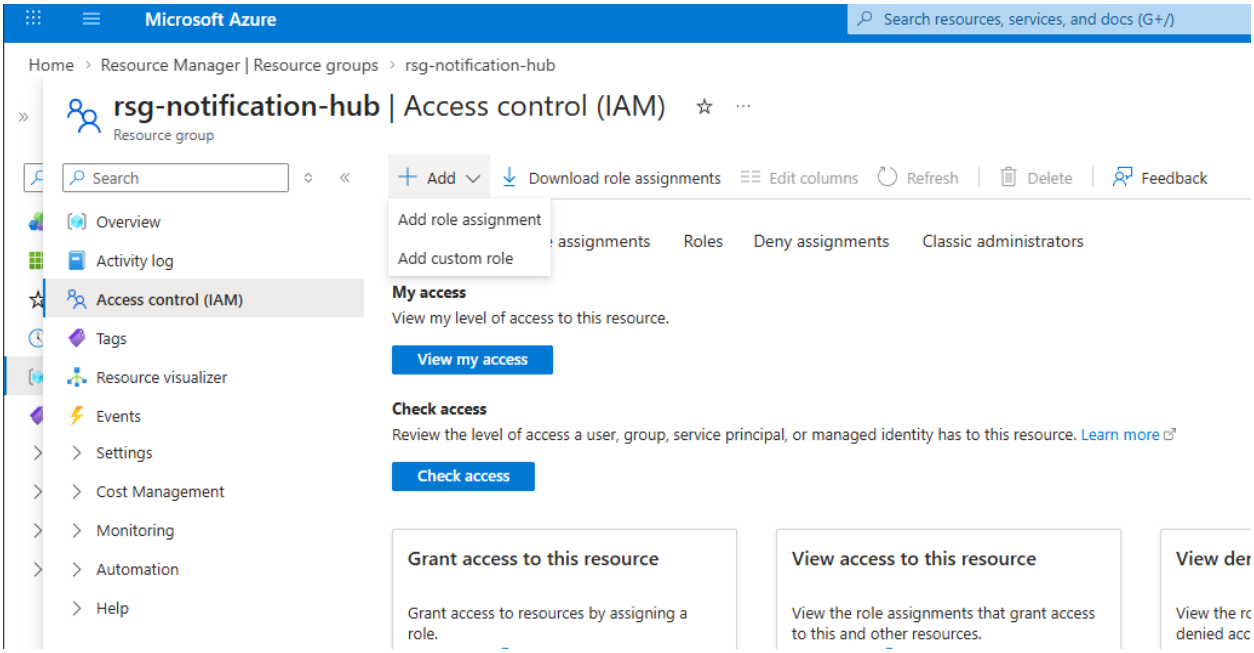


You can see all created groups



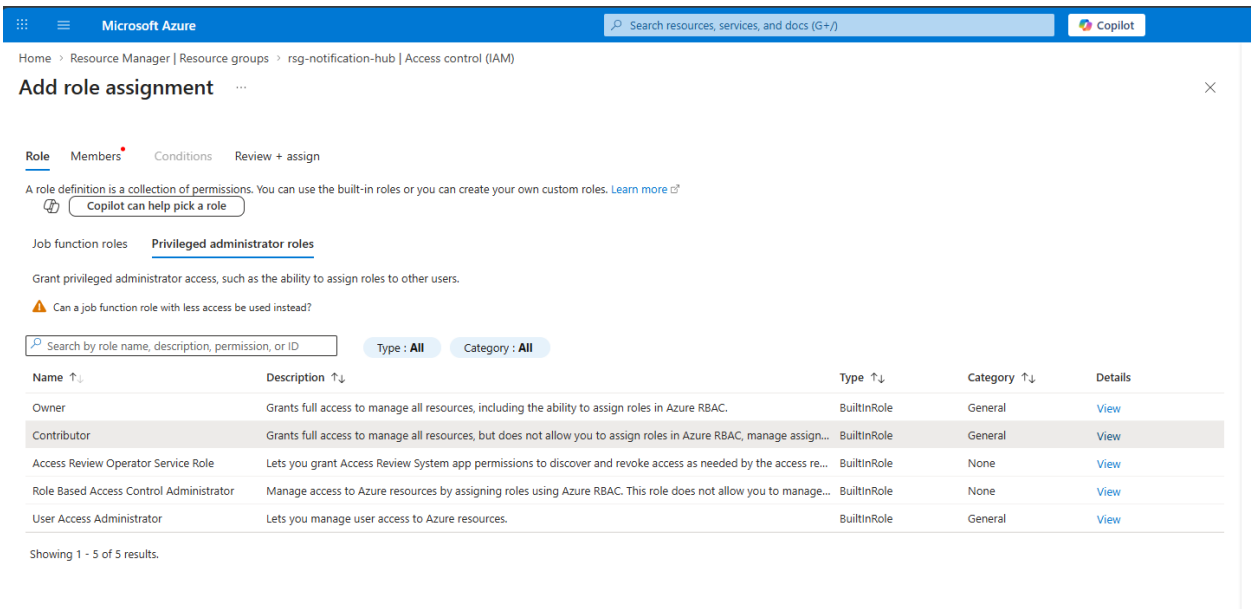
Go to that resource group:

And in that go to IAM:



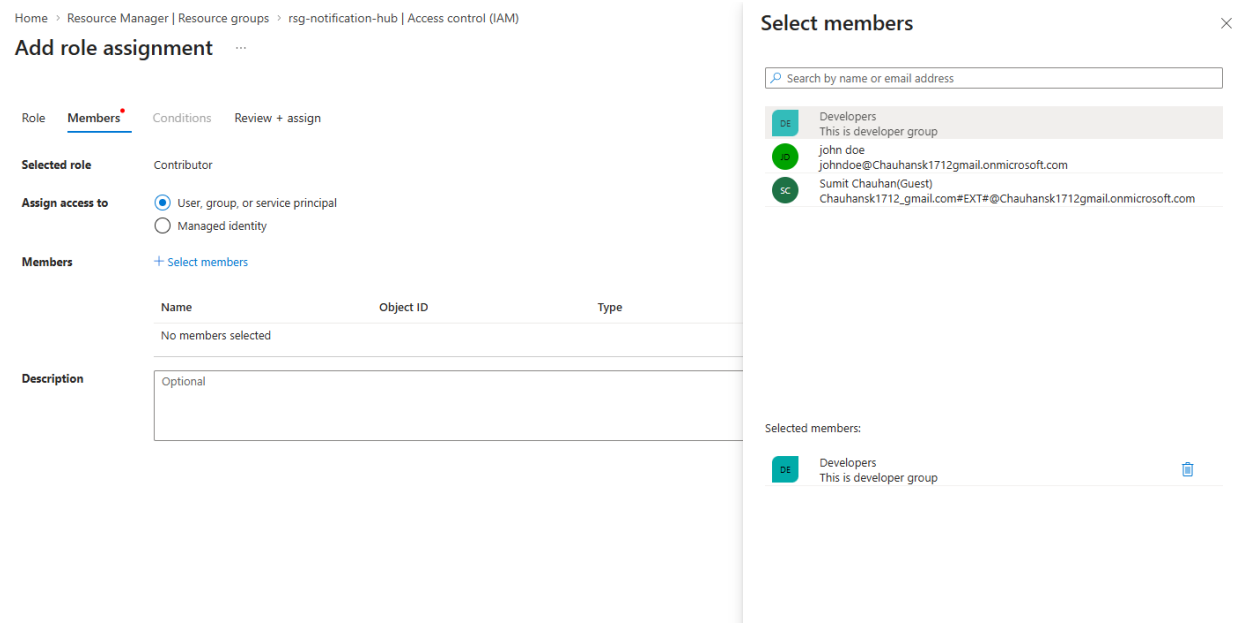
Click on Add role assignment

Select Privileged administrator roles

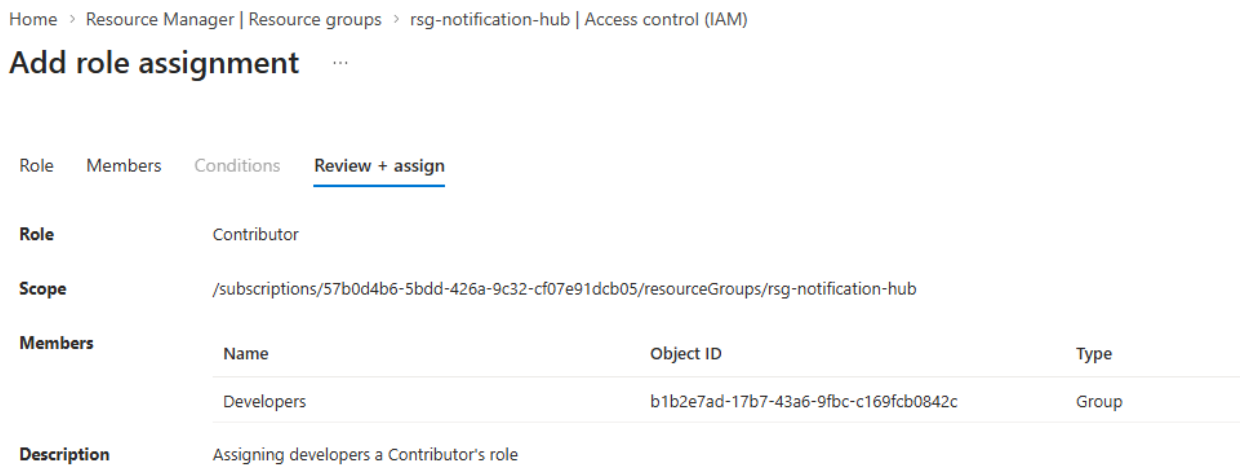


Select Contributor and click next

Then developers group in members



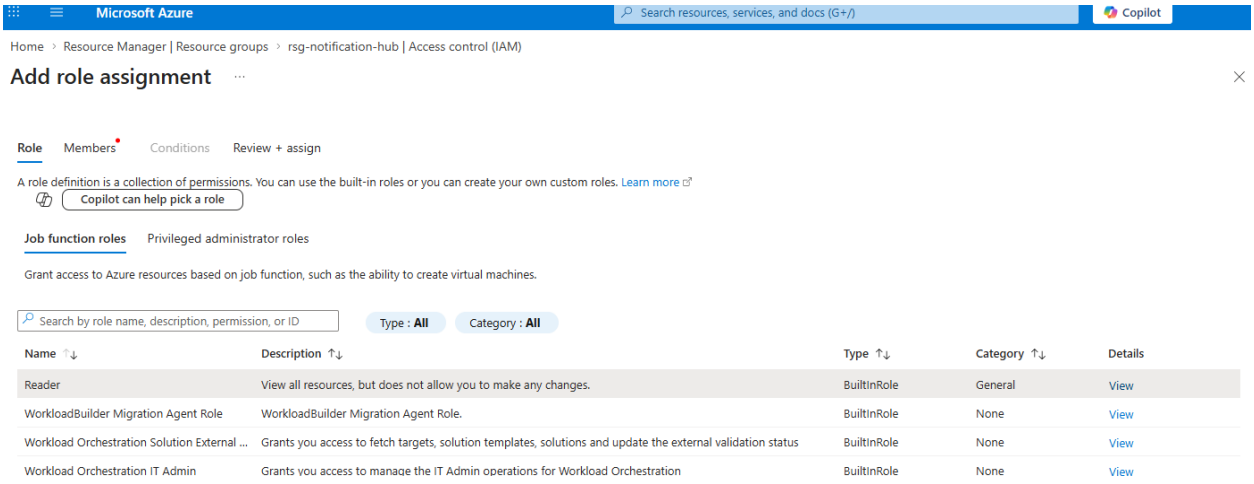
Review and assign:



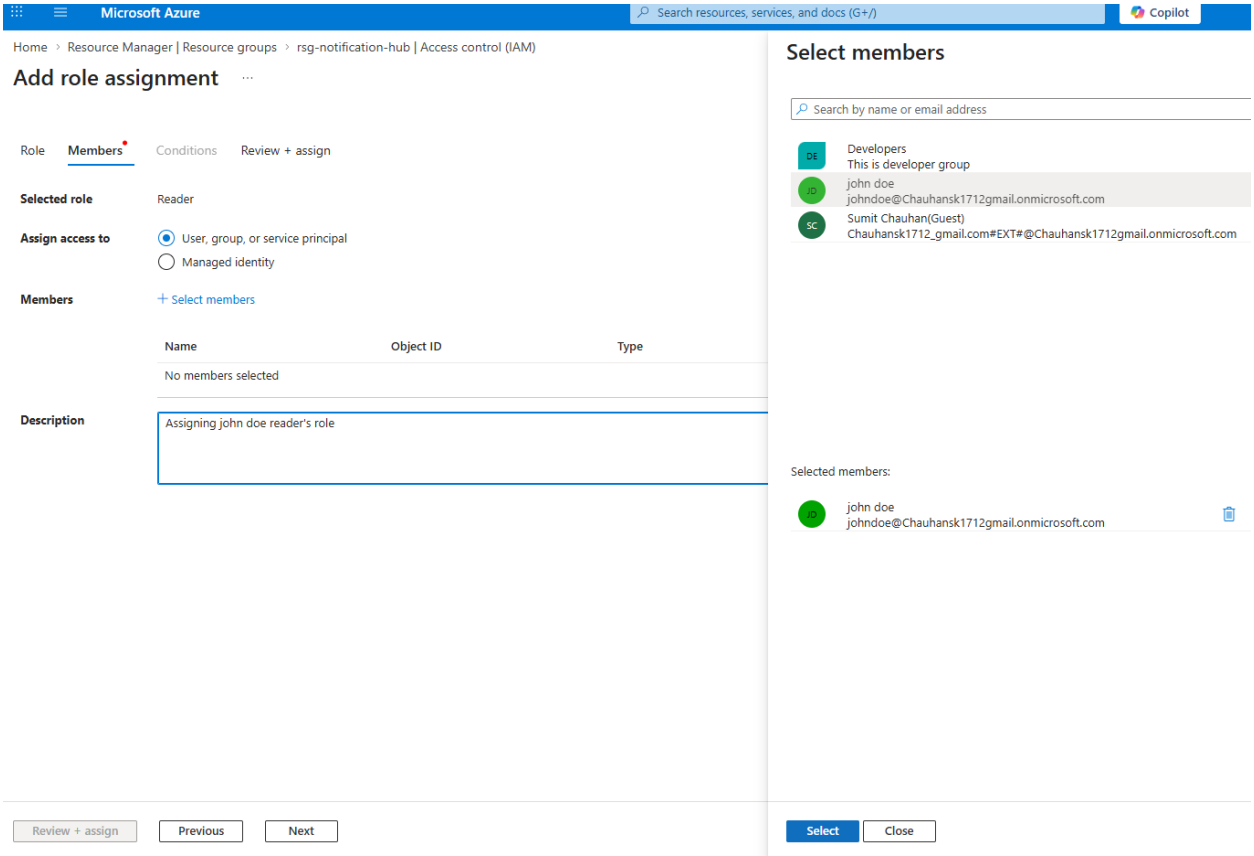
Now assigning read only access to specific user

Again go to rsg -> IAM

Select reader role



Select the member:



Home › Resource Manager | Resource groups › rsg-notification-hub | Access control (IAM)

Add role assignment ···

Role | Members | Conditions | **Review + assign**
