LMS azure fundamentals Practical

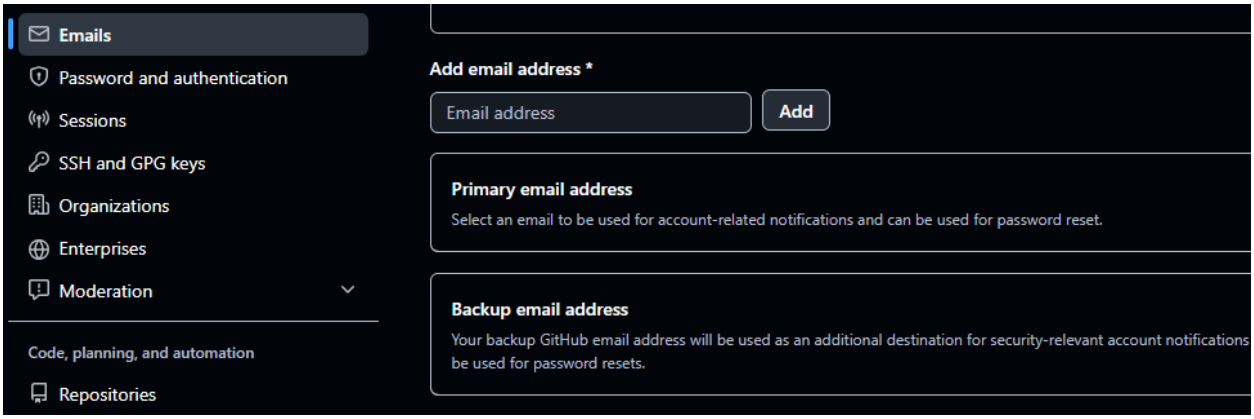
Task: to create azure account

In this document we will create azure student account to get 100$ free credits for 365 days

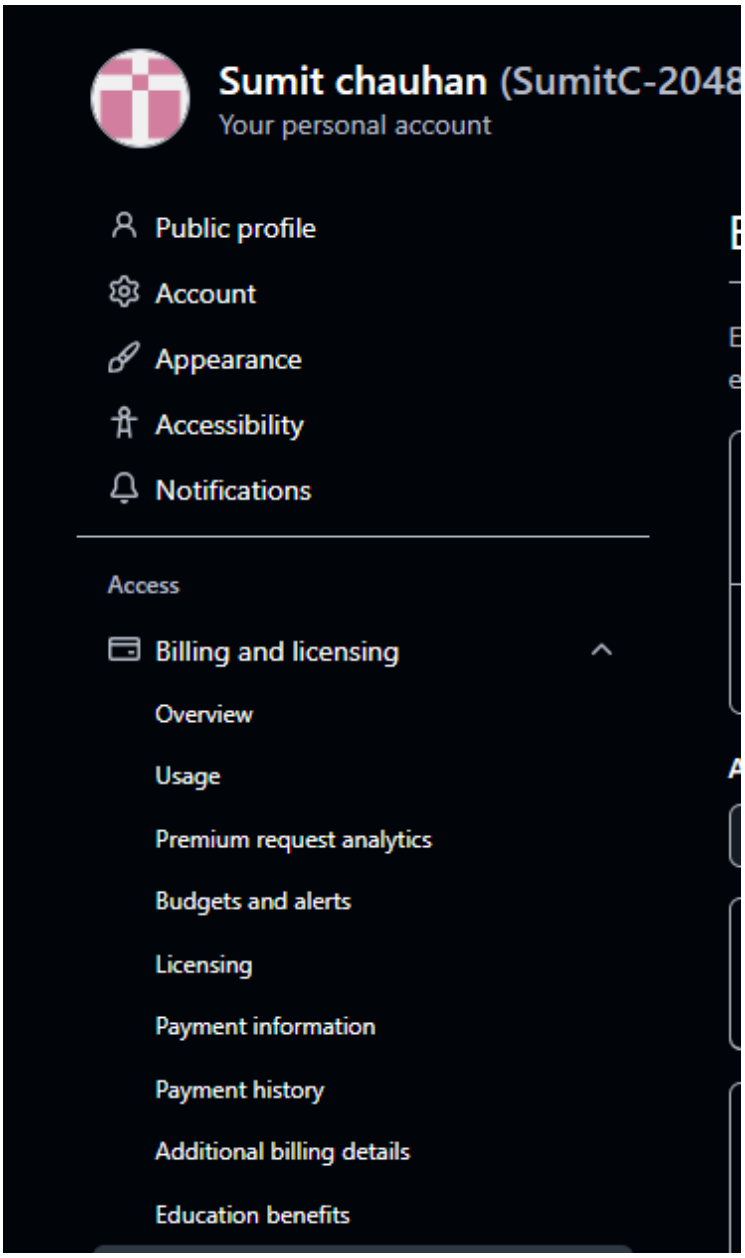
First open your github account (personal)

And in that settings

And add your student email (university mail) in it.



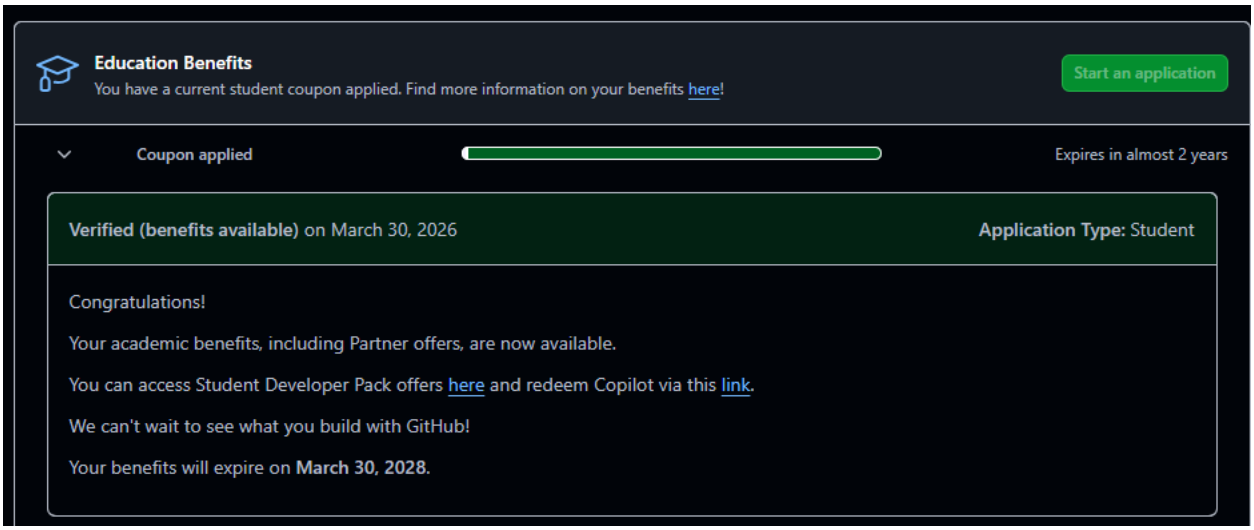
Then again settigns -> Billing and Liscensing -> Education benefits



Select your universities email, and start application for student benefits

Note that you need to upload your Uni. Id as a proof

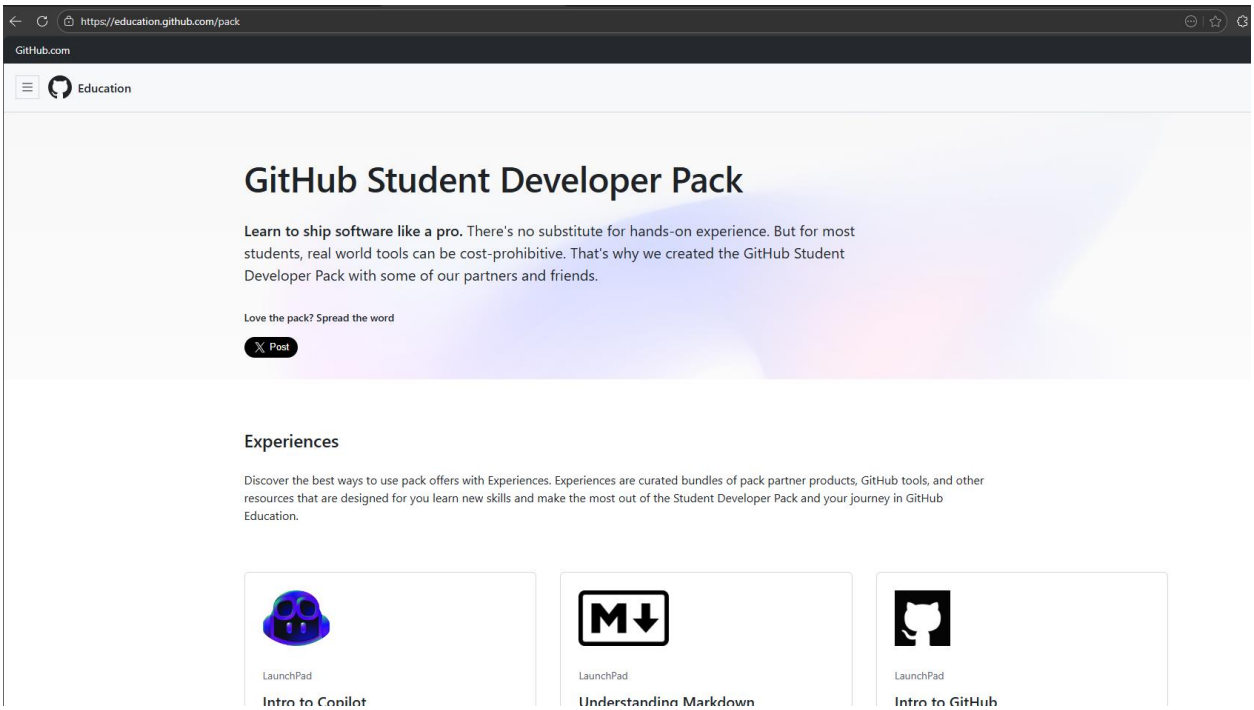
Exactly after 3 days of submitting the application you will see this:



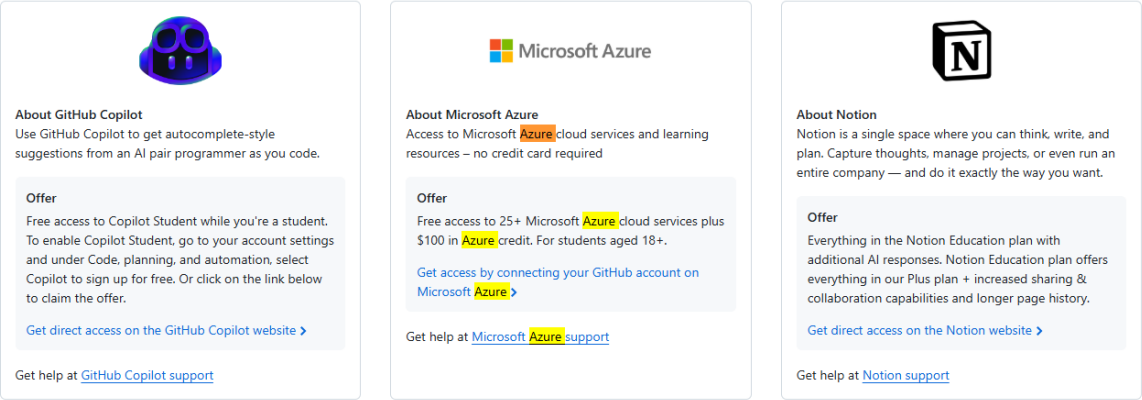
Then click on here link

You will see github student developer pack page

Login with github account [important]



And find microsoft azure service in that

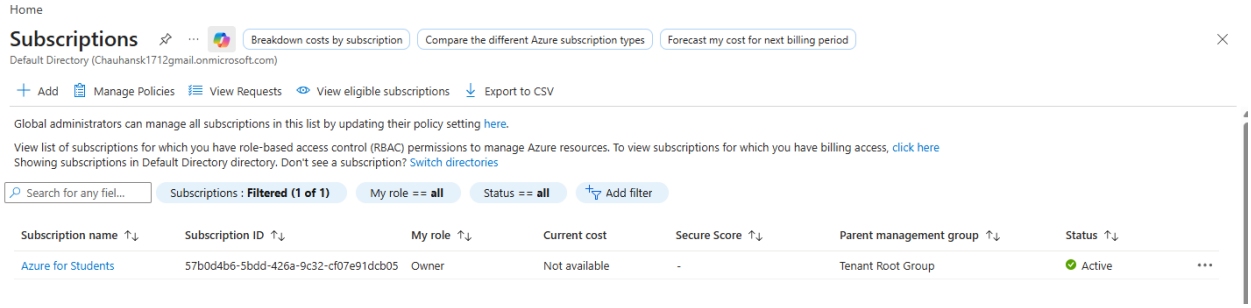


Click on it.

and Done!!

On azure portal

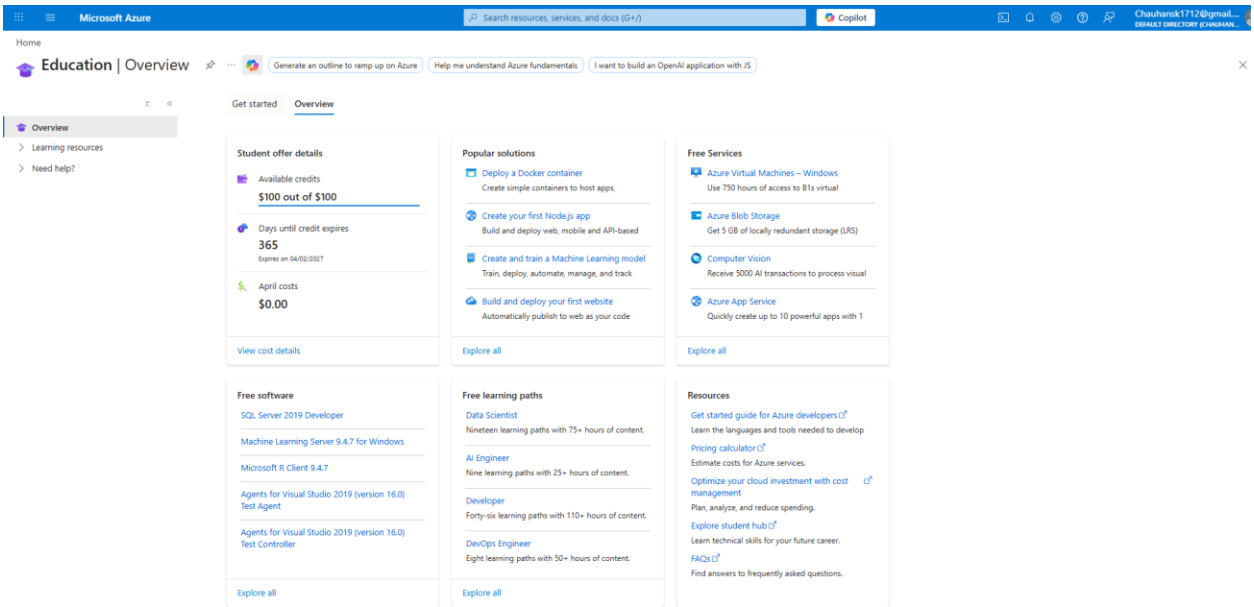
You will find subscription for students:



Finally you will be able to see the credits on your azure portal

For checking credits

Search “Education” on search bar (as we have created student account)



There you go!!

Start practicing !!!
