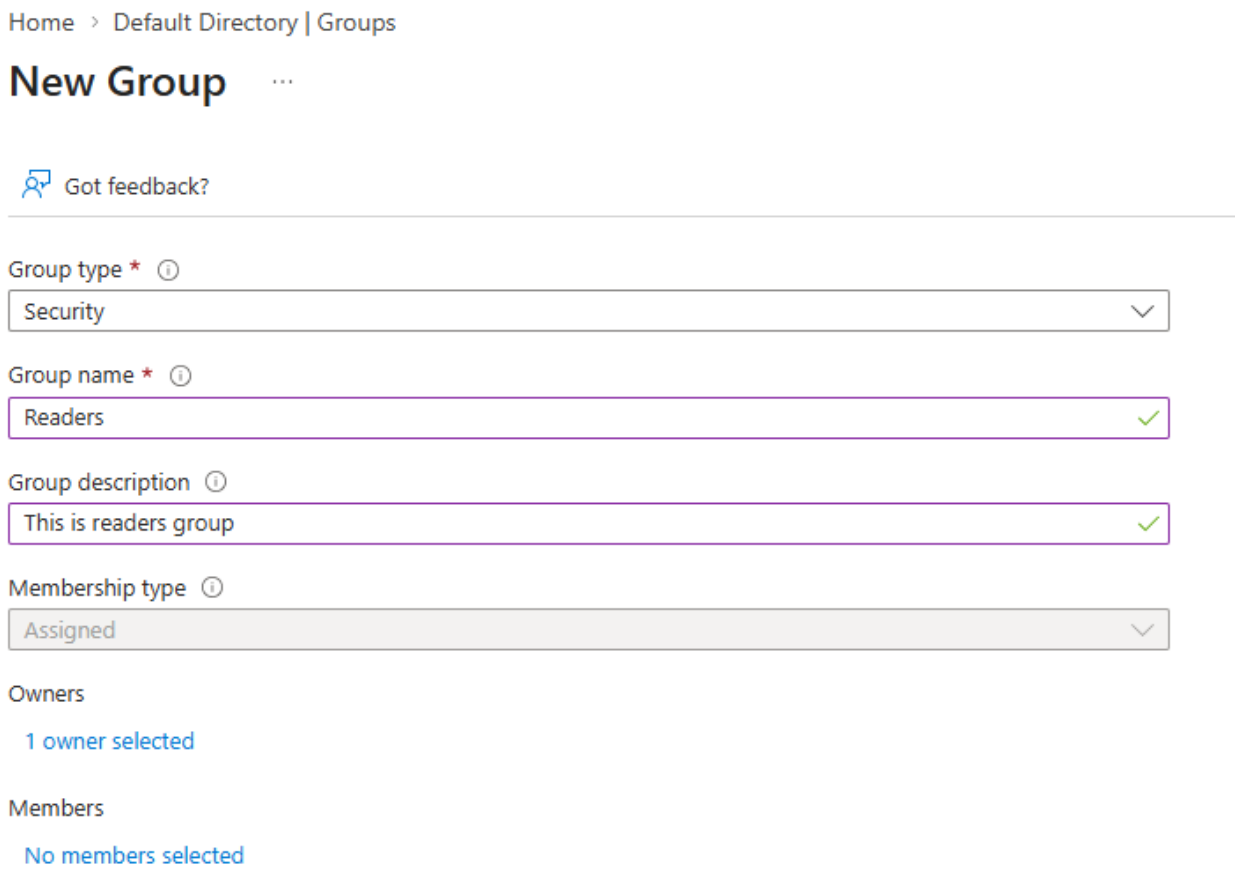
Name: Chauhan Sumit K.

Dept: Data Engineering

Task:

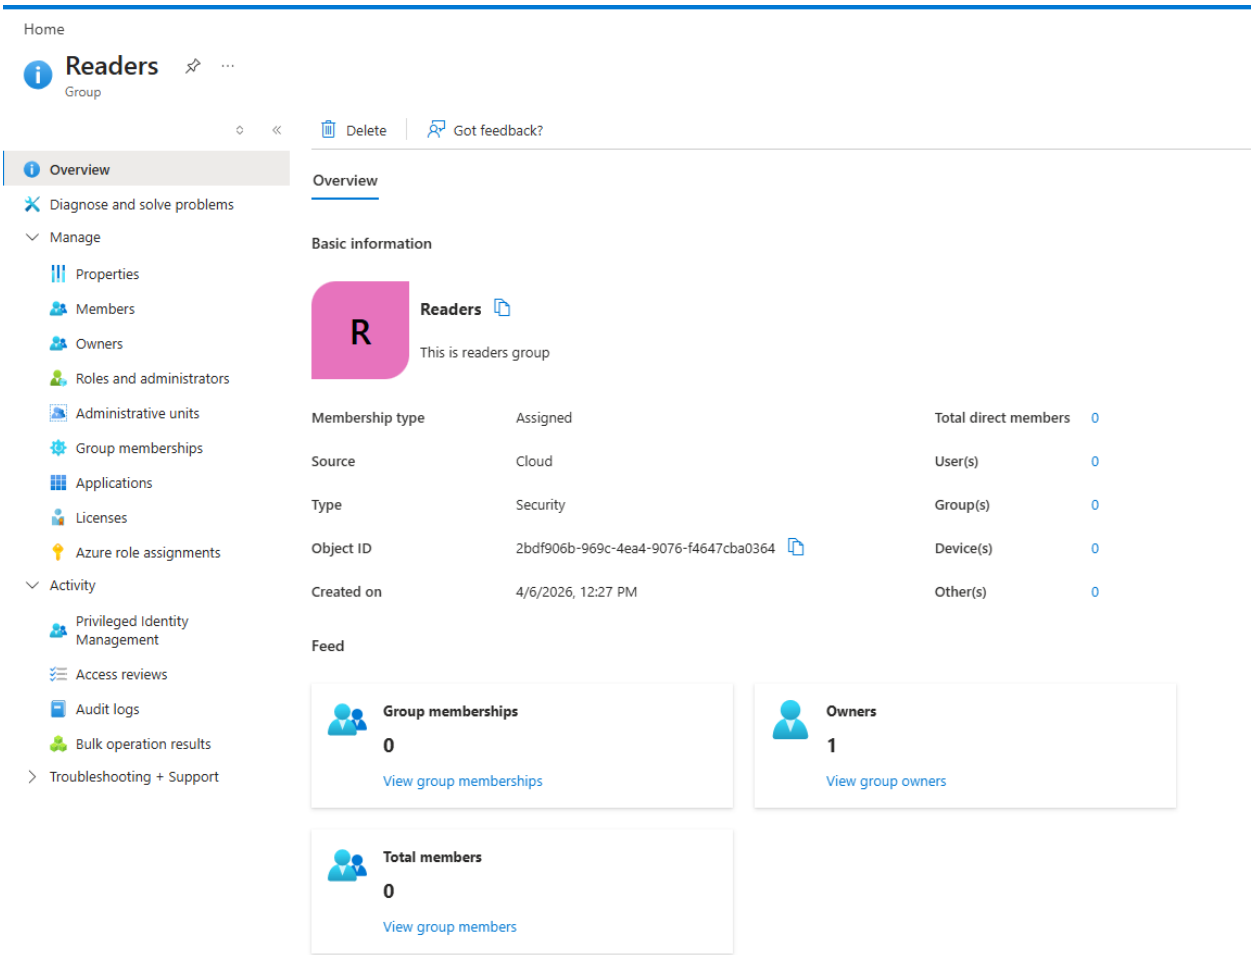
1. Create a group named "Readers" in Azure Active Directory.
2. Add a user as a member of the "Readers" group.
3. Assign the "Reader" role to the "Readers" group, granting them read-only access to specific resources.
4. Remove a user from the "Readers" group.

Creating readers group



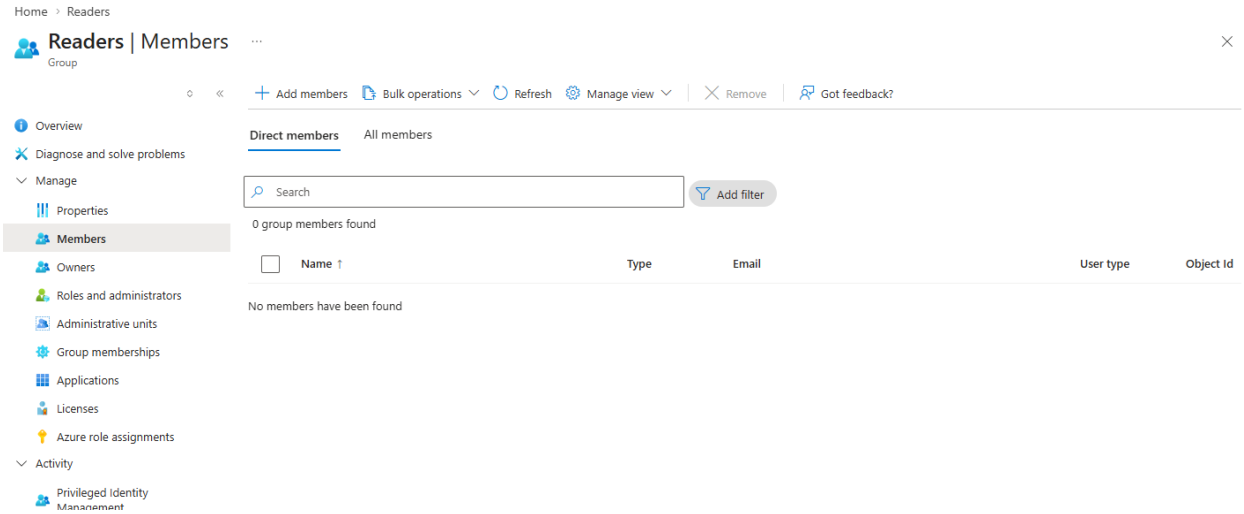
After creating a new group

Open the window for that group

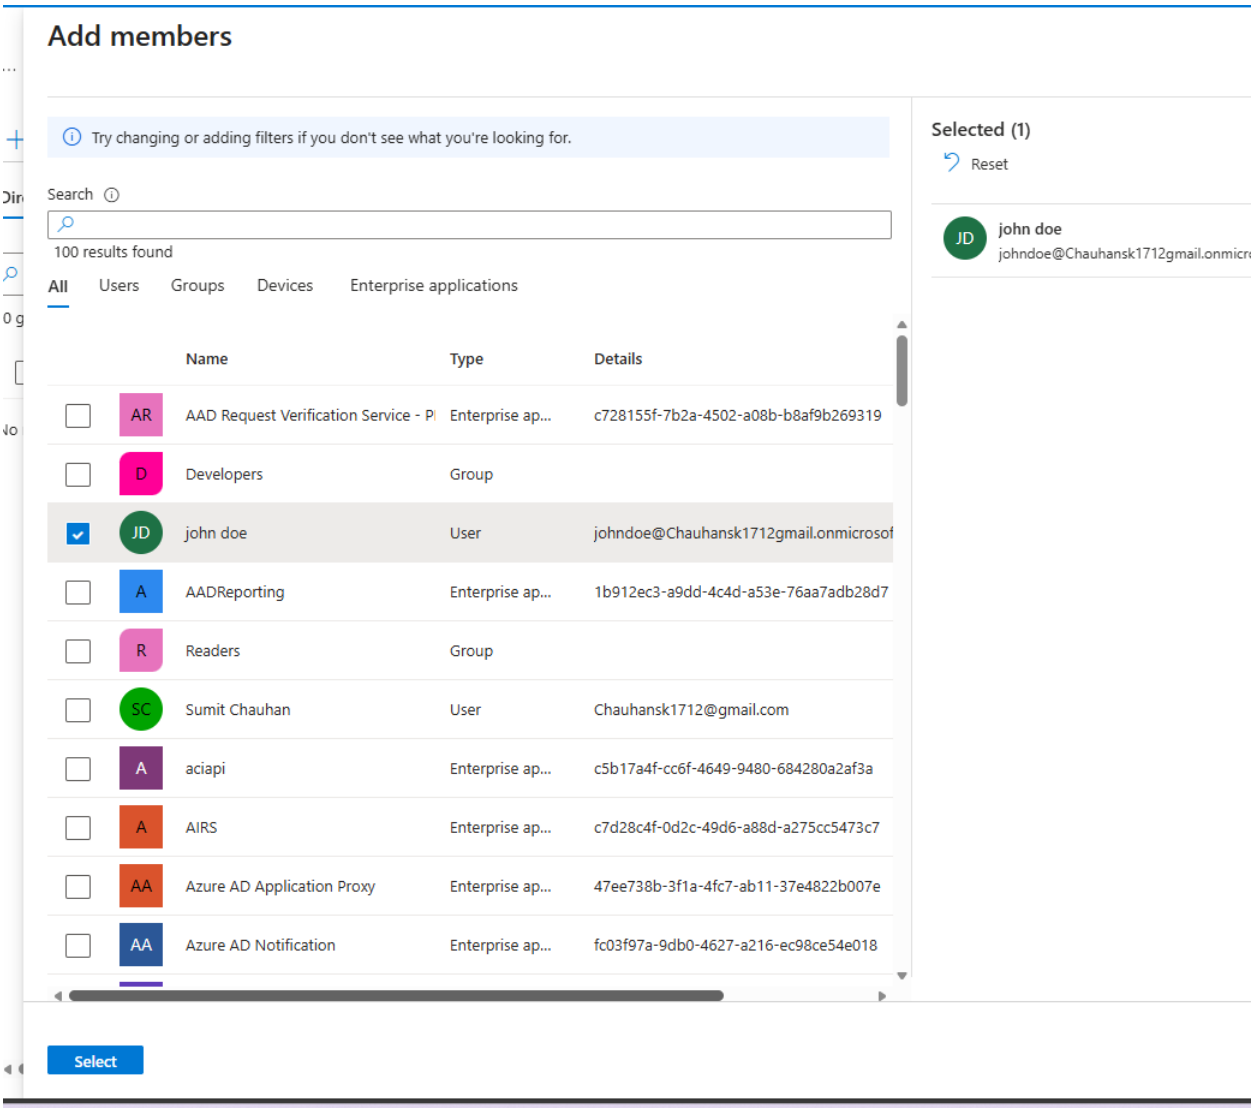


You can add members

On left side bar > manage > members



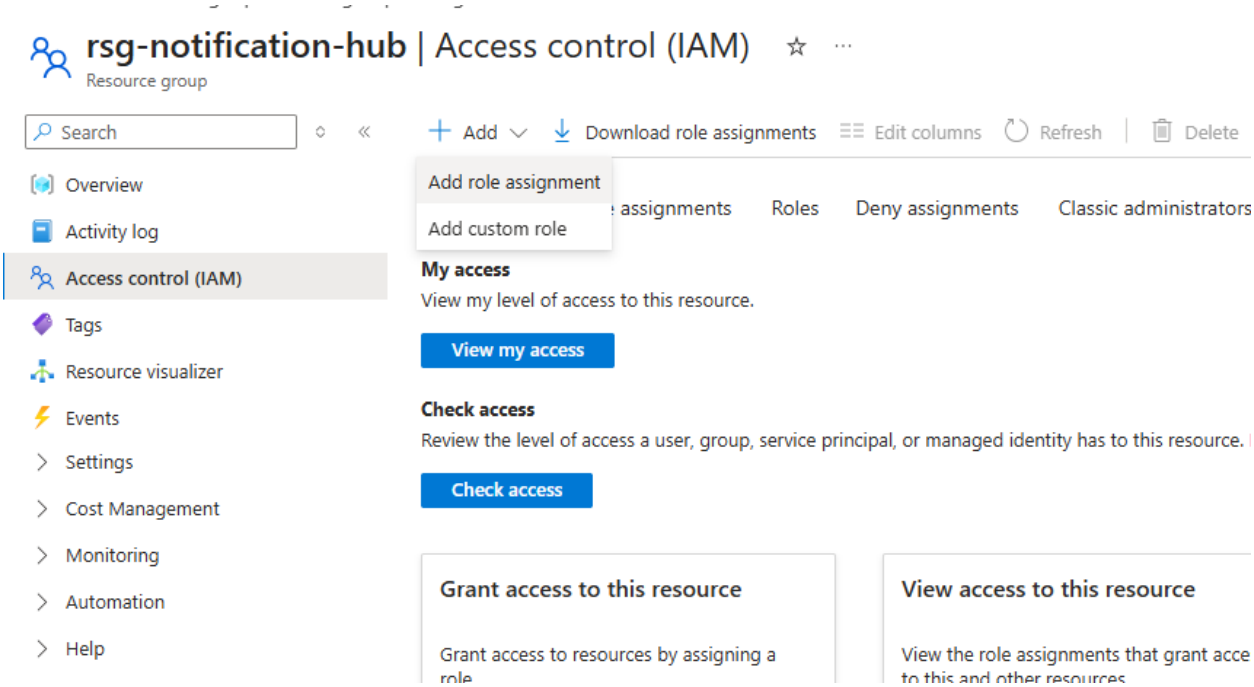
Click on add members



For assigning a Reader role to whole group

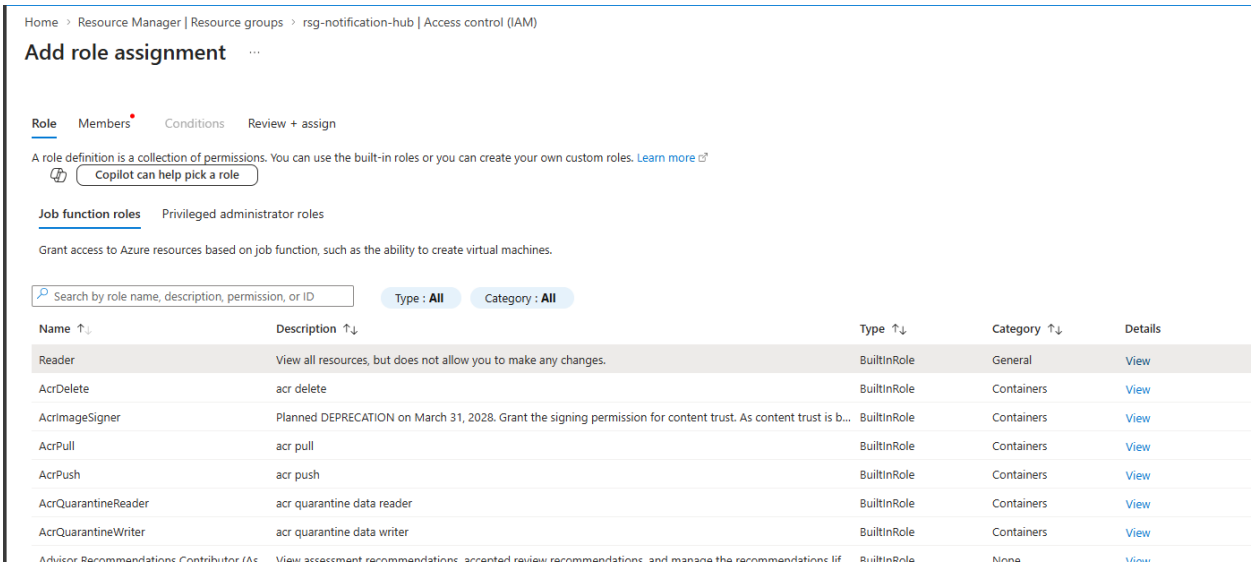
Go to the resource group in which you have readers group

Then left side bar > IAM



Click on add role assignment

Select reader role and clikc on next



Select the member (here Readers group)

Home › Resource Manager | Resource groups › rsg-notification-hub | Access control (IAM)

Add role assignment ...

Role | **Members** | Conditions | Review + assign

Selected role Reader

Assign access to
- (●) User, group, or service principal
- ( ) Managed identity

Members + Select members

Name	Object ID	Type
Readers	2bdf906b-969c-4ea4-9076-f4647cba0364	Group

Description Assigning Reader role to readers group

Review and assign

Add role assignment ...

Role | Members | Conditions | **Review + assign**

Role Reader

Scope /subscriptions/57b0d4b6-5bdd-426a-9c32-cf07e91dcb05/resourceGroups/rsg-notification-hub

Members

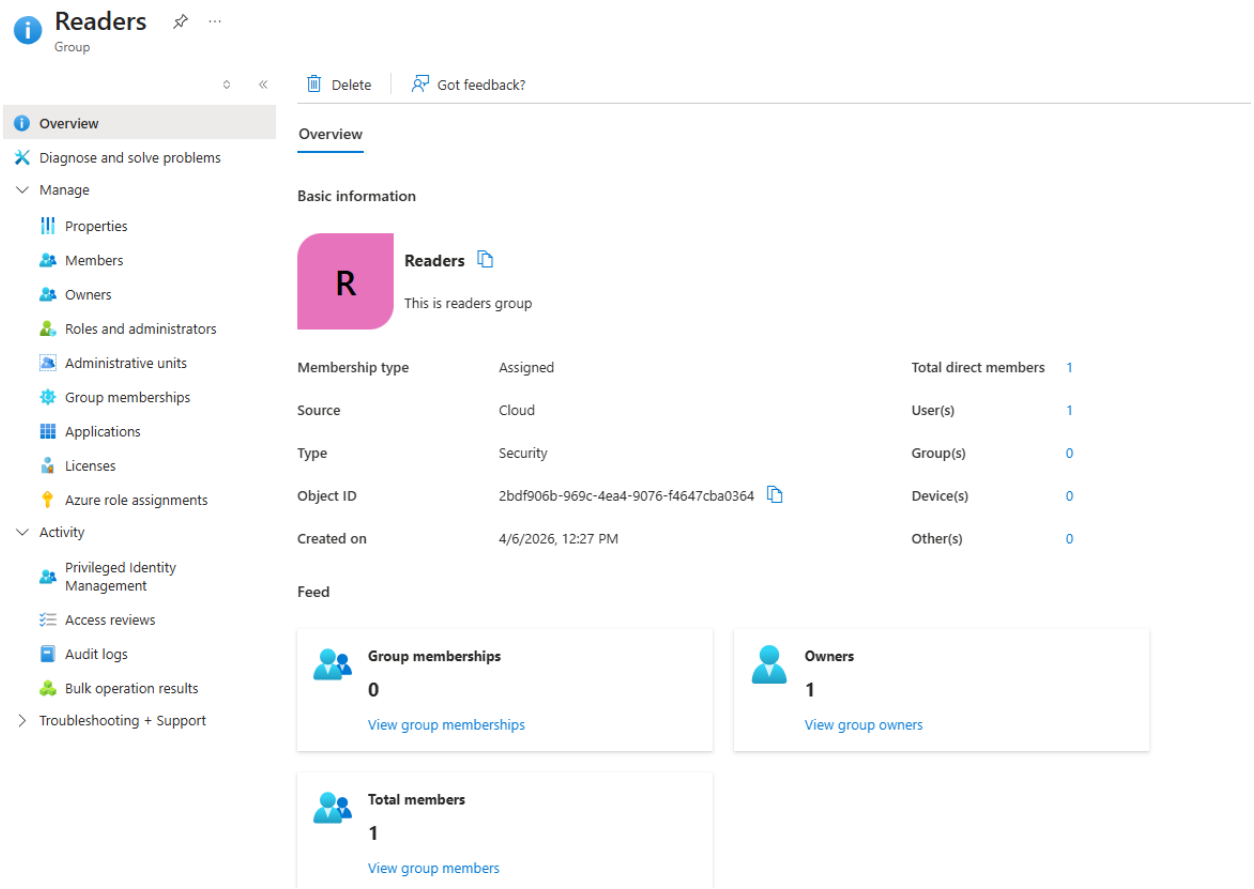
Name	Object ID	Type
Readers	2bdf906b-969c-4ea4-9076-f4647cba0364	Group

Description Assigning Reader role to readers group

Removing a user from readers group

Firstly open your group in azure portal

Search Entra ID > groups > all groups > readers



Click on view group members located at bottom of view
